Teamwire

Android Developer (m/w)

We are a leading start-up for mobile enterprise messaging. Our multi-platform solution includes development for mobile, tablet and desktop on the client side. On the back-end side we offer customers an on premise as well as a cloud and private cloud solution, and use high security standards and advanced protocols. We have a good mix of different technologies like Python, AngularJS, Node.js, relational and non-relational databases, just to mention a few. We are looking for an Android Developer (m/w) in full-time.

Your Assignment:

- You work in a great engineering team on the development of our Android app.

- You are responsible for new developments for our Android app in order to improve performance, usability and reliability.

- You own Android engineering tasks and projects, and drive these initiatives by yourself.

- You analyze, design, implement and ship new applications and features that are highly performant.

- You develop elegant algorithms and write clean as well as maintainable code.

- You work with outside data sources and API's.

- You write test cases for robustness, including edge cases, usability, and general reliability.

- You continuously discover, evaluate, and implement new technologies to maximize development efficiency.

- And when things break, you are able to quickly fix things.

Your Profile:

- You have studied computer science or a similar course.

- You like to develop apps for businesses which lead in usability, productivity and security.

- You have high quality standards, write elegant code and are used to mutual code reviews.

- You have very good knowledge of Java (and ideally of C and/or C++).

- You have very good knowledge of the Android SDK and related APIs.

- You have working experience with remote data via REST and JSON.

- You have experience with third-party libraries and APIs.

- You have at least 3 years experience of Android development and engineering projects in a professional environment.

- You quickly come to grips with new programming languages, frameworks and tools.

- You have a solid understanding of the full mobile development life cycle.

- You have knowledge of the general mobile landscape, architectures, trends, and emerging technologies.

- You are reliable, show initiative and work independently.

- You are a team player with a positive attitude and have strong communication skills.

- You are fluent in English (spoken and written).

What We Offer:

- A young, nice and motivated team

- An entrepreneurial organization with no hierarchies

- A workplace where you can constantly learn and personally grow

- Agile and customer-focussed development workflows

- Working with newest technologies in international environment

- Start-up feeling with creative freedom

Location:

Aschaffenburg (Germany), Barcelona (Spain), or potentially Home Office

About Teamwire:

Teamwire is a fast, easy to use and secure enterprise messaging app. Teamwire improves the internal communication with colleagues and teams, and increases the productivity of businesses and large corporations. Users can send 1:1 and group messages, post status updates, exchange video and voice messages, and share calendar dates, files and much more. Teamwire fully complies with strong German and European data protection needs

and is a completely encrypted solution. The service can be easily managed for the whole organization and ensures company-wide compliance. Teamwire is available for all mobile and desktop platforms as a cloud, private cloud or on-premise solution. More information: www.teamwire.eu
