

Full-Stack Developer (m/w)

We are a leading start-up for mobile enterprise messaging. Our multi-platform solution includes development on iOS, Android, Windows Phone and desktop on the client side. On the back-end side we offer customers an on premise as well as a cloud solution, and use high security standards and advanced protocols. We have a good mix of different technologies like JavaScript, Python, AngularJS, Node.js, relational and non-relational databases, just to mention a few. We are looking for a Full-Stack Developer (m/w) in full-time that likes the technologies mentioned (or at least would enjoy learning them) and is able to drive development projects and to further improve our product.

Your Assignment:

- You work in a small engineering team on a wide range of development topics.
- You own engineering tasks and projects, and drive these initiatives by yourself.
- You analyze, design and implement technically complex systems that are highly performant.
- You develop elegant algorithms and write clean as well as maintainable code.
- You are responsible for new developments and improvements of back-end systems and components (cloud as well as on-premise).
- You are responsible for new developments and improvements of front-end components and our administrator portal.
- You write test cases and prepare documentation.
- And when things break, you are able to quickly fix things.

Your Profile:

- You have studied computer science or a similar course.
- You like to develop IT solutions for businesses which lead in usability, productivity and security.
- You have high quality standards, write elegant code and are used to mutual code reviews.
- You have very good knowledge of at least 3 of these programming languages and frameworks: Python, Django, SQL, JavaScript, AngularJS.
- You have got good knowledge of git, Linux, and hopefully have worked with Docker and Ansible or a similar automation solution.

- You quickly come to grips with new programming languages, frameworks and tools.
- You have at least 5 years experience of software engineering and projects in a professional environment.
- You are reliable, show initiative and work independently.
- You are a team player with a positive attitude and have strong communication skills.
- You are fluent in English (spoken and written).

What We Offer:

- A young, nice and motivated team
- An entrepreneurial organization with no hierarchies
- A workplace where you can constantly learn and personally grow
- Agile and customer-focussed development workflows
- Working with newest technologies in international environment
- Start-up feeling with creative freedom

Location:

Aschaffenburg (Germany), Madrid (Spain), or partially Home Office

About Teamwire:

Teamwire is a fast, intuitive and secure enterprise messaging app. Teamwire solves the Whatsapp problem of businesses, increases productivity and improves team communication in the messaging era. Users can send 1:1 and group messages, and exchange photos, videos, voice messages, locations, calendar dates, files and much more. Teamwire fully complies with strong European data protection and the GDPR, and is a completely encrypted solution. The service can be easily managed for the whole enterprise, supports leading MDM/EMM solutions and ensures company-wide compliance. Teamwire is available for all mobile and desktop platforms as a cloud, private cloud or on-premise solution. Leading enterprises like Sparkassen-Finanzgruppe, Barmer, NDR, SMS Group and the German State Ministry for Work use Teamwire. More information: www.teamwire.eu
