Teamwire

Senior Operations Engineer (m/w)

We are a leading start-up for mobile enterprise messaging. Our multi-platform solution includes development for mobile, tablet and desktop on the client side. On the back-end side we offer customers an on premise as well as a cloud and private cloud solution, and use high security standards and advanced protocols. We have a good mix of different technologies like Docker, Ansible, Node.js, relational and non-relational databases, just to mention a few. We are looking for a Senior Operations Engineer (m/w) in full-time that likes the technologies mentioned (or at least would enjoy learning them) and is able to drive development projects and to ensure high performance, reliability and scalability of Teamwire.

Your Assignment:

- You work in a great engineering team on a wide range of development topics.

- You own engineering tasks and projects, and drive these initiatives by yourself.

- You analyze, design and implement technically complex systems that are highly performant, reliable and scalable.

- You develop elegant algorithms and write clean as well as maintainable code.

- You are responsible for new developments and improvements of back-end systems and components (cloud as well as on-premise).

- You are responsible for high performance, scalability, reliability and availability of servers and services.

- You participate in 24x7 operation support and on-call rotation.

- You write test cases for configuration management and prepare documentation.

- And when things break, you are able to quickly fix things.

Your Profile:

- You have ideally studied computer science or a similar course.

- You like to develop IT solutions for businesses which lead in usability, productivity and security.

- You have high quality standards, find elegant solutions and are used to mutual code and intervention reviews.

- You have very good knowledge of at least 3 of these programming languages: awk, bash, Python, JavaScript, SQL.

- You have got very good knowledge of GNU/Linux, Docker and Ansible or a similar automation solution.

- You quickly come to grips with new programming languages, frameworks and tools.

- You have at least 5 years experience of software engineering and projects in a professional environment.

- You like to find solutions for architectural problems before they appear.

- You have a habit of automating every solution you build.

- You are reliable, show initiative and work independently.

- You are a team player with a positive attitude and have strong communication skills.

- You are fluent in English (spoken and written).

What We Offer:

- A young, nice and motivated team

- An entrepreneurial organization with no hierarchies

- A workplace where you can constantly learn and personally grow

- Agile and customer-focussed development workflows

- Working with newest technologies in international environment

- Start-up feeling with creative freedom

Location:

Aschaffenburg (Germany), Barcelona (Spain), or potentially Home Office

About Teamwire:

Teamwire is a fast, easy to use and secure enterprise messaging app. Teamwire improves the internal communication with colleagues and teams, and increases the productivity of businesses and large corporations. Users can send 1:1 and group messages, post status updates, exchange video and voice messages, and share calendar dates, files and much more. Teamwire fully complies with strong German and European data protection needs and is a completely encrypted solution. The service can be easily managed for the whole organization and ensures company-wide compliance. Teamwire is

available for all mobile and desktop platforms as a cloud, private cloud or on-premise solution. More information: www.teamwire.eu
