

Secure “WhatsApp” for Energy & Utilities?

Much more than Secure Messaging

Teamware is much more than a secure messaging app for the energy and utilities companies.

Teamware solves the WhatsApp problem, simplifies collaboration and improves urgent communication.

Our secure messaging app also helps to automate workflows and enables easy coordination of emergencies.

Teamware is fully GDPR-compliant and a **completely encrypted solution**. As a German provider we ensure the highest levels of data protection, security and usability, that are appreciated by leading energy companies.

Key Benefits

- Improved team communication and collaboration.
- Faster information exchange.
- Accelerated coordination in urgent situations.
- Strong data protection and security.
- Professional administration and compliance.
- Improved protection of government officials.

Primary Use Cases

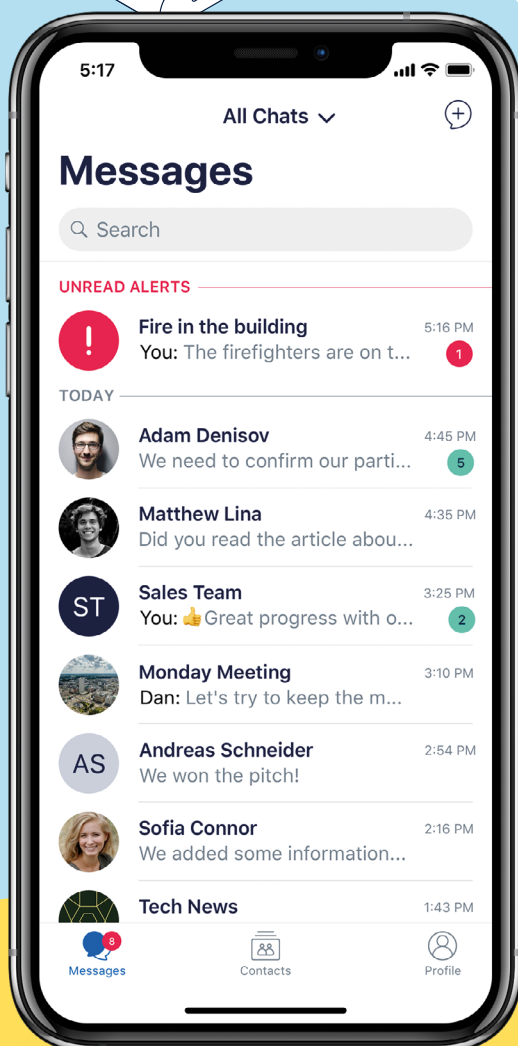

- Real-time messaging to quickly collaborate and make decisions.
- Topic-specific group chats and permanent team channels.
- Easy exchange of digital content (e.g. documents, photos, videos).
- Fast sharing of news, updates and site information.
- Direct collaboration of field, service and office staff.
- Alerting in case of an emergency or critical situation.
- Automating work flows with integrations and chat bots.

Typical Customer Needs

- Seeking a WhatsApp alternative for utility companies.
- Improving the collaboration and productivity of teams.
- Empowering an increasingly “mobile” workforce.
- Improving emergency and crisis communication.
- Protecting communication and confidential data.
- Ensuring data sovereignty, GDPR and compliance.

Availability

Native apps for iPhone, iPad, Android, Windows, Linux and Mac, as well as a browser client. Deployment as German cloud, private cloud or on-premise solution.
